

# *Timber Bi Fold*

## Step 4 - Door Installation

The doors are labelled in sets starting from the pivot end. Each door will have a letter / number on top of each door or in the glazing rebate (if doors are unglazed)

For systems folding one way each door will be labelled

A - B - C - D ... or 1 - 2 - 3 - 4 ...

(A) Or (1) being the pivot door where all the doors slide towards

For systems folding both ways the doors will be labelled

A - B - C - D ... 4 - 3 - 2 - 1

(A) and (1) being the pivot doors where each set folds towards.

The pivot door/s is the first door to be installed.

Each hardware set is in a separate box which has been labelled according to the door and position it is to be used for.

I.e. on a 4 door system labelled A through D you will receive 5 running gear boxes.

Door A will be written on the first box which is the pivot hardware.

Doors A-B will be written on the hinge box

Doors B-C will be written on the intermediate running gear box

Doors C-D will be written on the hinge box

Door D will be written on the end running gear box.

Please see the instructions in the pivot gear box (Door A) for hardware specific instructions.
